origins speak to the earth is an anthology of scientific evidence supporting a creation global flood young earth worldview it is written primarily for students as an alternative to the theory of evolution god himself formed the earth and made it he hath established it he did not create it a waste place he created it not in vain he formed it to be inhabited isaiah 45 18

in kevin macdonald s *metaphysical failure* jonas e alexis offers a thoroughly researched nuanced and lucid analysis of kevin macdonald s thought in particular macdonald s belief in biological and philosophical darwinism it is an important book that fills a critical gap in the literature on the history of revolutionary movements and darwinism both in the west and in asia it is also a study that adds many significant strands

to the densely interwoven history of ideas such as malthusianism and eugenics alexis s book engages debates in the history of ideas going back to madison grant and beyond and the history of darwinism it challenges many of the life long prevailing assumptions about identity politics and produces a powerful critique of how scientific theories have been misused to uphold misguided and faulty categorizations powerfully reasoned and backed with a startling array of documented studies kevin macdonald s metaphysical failure presents an in depth look at key beliefs behind many mistaken and consequently destructive actions taken by numerous writers and thinkers particularly darwin s ardent enthusiasts and devoted disciples the book presents eye opening insights into the historical development of darwin s ideological project and how that project ended up crippling darwin s intellectual children from richard dawkins francis crick james watson daniel dennett ernst mayr and e o wilson to kevin macdonald richard spencer david duke and jared taylor

neil campbell and jane reece s biology remains unsurpassed as the most successful majors biology textbook in the world this text has invited more than 4 million students into the study of this dynamic and essential discipline the authors have restructured each chapter around a conceptual framework of five or six big ideas an overview draws students in and sets the stage for the rest of the chapter each numbered concept head announces the beginning of a new concept and concept check questions at the end of each chapter encourage students to assess their mastery of a given concept new inquiry figures focus students on the experimental process and new research method figures illustrate important techniques in biology each chapter ends with a scientific inquiry question that asks students to apply scientific investigation skills to the content of the chapter

this curriculum supplement guide brings the latest medical discoveries to classrooms this module focuses on the objectives of introducing students to major concepts related to emerging and re emerging infectious diseases and developing an understanding of the relationship between biomedical research and personal and public health this module includes five major sections 1 understanding emerging and re emerging infectious diseases 2 implementing module 3 student activities 4 additional resources for teachers and 5 a glossary and references section contains 27 references yds

in an age of unprecedented corporate and political control over life inside of educational institutions this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in k 16 schools to perpetuate their interests at the expense of minoritized social groups the contributors provide a comprehensive examination of how textbooks the most dominant cultural force in which corporations and political leaders impact the schooling curricula shape students thoughts and behavior perpetuate power in dominant groups and trivialize social groups who are oppressed on the structural axes of race class gender sexuality and dis ability several contributors also generate critical insight

in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant western narratives that normalize and privilege patriotism militarism consumerism white supremacy heterosexism rugged individualism technology and a positivistic conception of the world finally the book highlights several textbooks that challenge readers to rethink their stereotypical views of the other to reflect upon the constitutive forces causing oppression in schools and in the wider society and to reflect upon how to challenge corporate and political dominance over knowledge production
